PROFESSIONAL SUMMARY

Computer engineering student specializing in cybersecurity and DevOps. Hands-on experience with secure network architectures, SOC operations, digital forensics and incident response (DFIR), and CI/CD pipelines. Skilled in SIEM, SOAR, threat hunting, detection engineering (Sigma, YARA, MITRE ATT&CK) and containerized environments (Docker, Kubernetes).

WORK EXPERIENCE

Cybersecurity Intern | ATOR DFIR | Tunis, Tunisia
Jul 2026 – Sep 2026 | DFIR & Threat Hunting Platform (team of 3)

- Designed the layered architecture and FastAPI ingestion API (enrollment, token authentication, audit logging) of the platform, and built the analyst dashboard (Jinja2, Bootstrap, Chart.js).
- Implemented the detection engine with Sigma rules translated to SQL via pySigma, YARA scanning, IOC correlation and MITRE ATT&CK enrichment.
- Reconstructed incident timelines, attack chains and root causes, and generated investigator-ready PDF, JSON, STIX 2.1 and ATT&CK Navigator reports.
- Developed endpoint containment and on-demand forensic collection with Velociraptor, and integrated ML-based risk scoring and threat-hunting leads.

Developer Intern | NEXTSTEP IT | Tunisia
Jul 2025 – Aug 2025 | Automated Report Generation System

- Developed a Django web application that automates report generation from internal templates.
- Implemented custom features tailored to business needs, improving efficiency and reducing manual tasks.

Developer Intern | Safran Electrical & Power Tunisia | Tunisia
Jul 2024 – Sep 2024 | Industrial Web Application

- Developed an industrial web application (AngularJS, Spring Boot, SQL Server) to manage tests, stock and workflows.
- Delivered an ergonomic, responsive interface for day-to-day use by production teams.

PROJECTS

Securify — Zone-Based Network Security & SOC Architecture
Academic project | Wazuh, Shuffle, MISP, TheHive, Cortex, pfSense, OPNsense

- Designed and implemented a segmented network architecture with multiple security zones (DMZ, Honeypot, SOC, LAN).
- Deployed pfSense and OPNsense firewalls for traffic control and isolation.
- Set up a complete SOC integrating Wazuh (SIEM), Shuffle (SOAR), MISP (threat intelligence) and TheHive/Cortex (incident response).
- Simulated attacks and analyzed the detection and response processes.

CI/CD Pipeline for Spring Boot Application
Academic project | Jenkins, GitHub, SonarQube, Docker, Kubernetes, Prometheus, Grafana

- Built a complete CI/CD pipeline automating build, test and deployment.
- Integrated Jenkins with GitHub, SonarQube code-quality analysis, Docker containerization and Kubernetes deployment.
- Set up monitoring with Prometheus and Grafana.

ConnectSphere — Management Application
Academic project | Symfony, Java, JavaFX

- Built a management application (recruitment, services, events) with a Symfony web client and a Java/JavaFX desktop client, including role management and API integration.

EDUCATION

Engineering Degree in Computer Science
ESPRIT — École Supérieure Privée d'Ingénierie et de Technologie | Ariana, Tunisia | Sep 2023 – Present

Preparatory Studies for Engineering
Institut Préparatoire aux Études d'Ingénieurs de Tunis (IPEIT) | Tunis, Tunisia | Sep 2020 – Jun 2023

Baccalaureate in Experimental Sciences
Tunisia | 2020

CERTIFICATIONS

Fortinet verification: training.fortinet.com (enter the ID).

- Cisco CCNA 2: Switching, Routing, and Wireless Essentials (SRWE) — Cisco Networking Academy
- Fortinet NSE 1: Network Security Associate — Fortinet · ID 5116367382YB
- Fortinet NSE 2: Network Security Associate — Fortinet · ID 5048210791YB
- Fortinet NSE 3: Network Security Associate — Fortinet · ID 2083836175YB

SKILLS

Programming Languages: Python, Java, JavaScript, C++, PHP, SQL
Frameworks: FastAPI, Django, Spring Boot, Angular, Symfony
Cybersecurity: DFIR, threat hunting, detection engineering (Sigma, YARA, MITRE ATT&CK), Velociraptor, SOC operations, SIEM (Wazuh), SOAR (Shuffle), threat intelligence (MISP), incident response (TheHive, Cortex), firewalls (pfSense, OPNsense, Fortinet), network segmentation, honeypots, DMZ design
DevOps & Cloud: CI/CD (Jenkins, GitHub), Docker, Kubernetes, Vagrant, SonarQube, Prometheus, Grafana
Languages: Arabic (Native), English (Advanced), French (Intermediate), Spanish (Beginner)

VOLUNTEER EXPERIENCE

Volunteer | AVEC — Association de Volontariat, Échange Culturel et Action des Jeunes | Nabeul, Tunisia
2025 | 3 months

- Took part in youth action and cultural exchange activities alongside international volunteers.
- Communicated daily in English and French with volunteers from different countries and cultures.

Assistant Head of Sponsorship Department | Club GMCxLPN | Tunisia
Sep 2018 – Jun 2020

INTERESTS

PC building and optimization, team and individual sports, camping, chess
